DATAGENIX CLAIMSCAPE

CLAIMSCAPE 2026

Advancing Claims Administration for the Way Healthcare Organizations Function Today

ClaimScape updated features and initiatives focus on faster performance, stronger connectivity, improved self-service experiences, and scalable infrastructure for growing operational demands.

ClaimScape: Built to Support the Full Claims Lifecycle

Claims Processing
Auto adjudication, claims workflows, payment processing, and operational efficiency tools.

Authorizations & Case Management
Integrated workflows designed to support utilization review and authorization management.

Reporting & Analytics
Self-service reporting, dashboards, business intelligence, and operational monitoring.

Provider & Member Access
Modern portal experiences with real-time access to eligibility, claims status, and communications.

Integrations & APIs
Flexible connectivity with internal systems, external partners, and third-party platforms.

Designed for Modern Claims Operations: What's New in 2026?

Enhanced Claims & Authorization APIs
- Improved submission and inquiry workflows
- Expanded real-time integration support
- Easier connectivity with external systems and partners

Member & Provider Experience
